

Dear Business Partners and Friends,

We proudly announce the official release of the **P-H12S10-01** DNA air filter for the HONDA VFR 1200 2010-2011.

- This New filter features DNA'S advanced **Fcd** (full Contour Design), this innovative design by DNA allows the filtering material to follow precisely the contour of the air box and uses the complete air box surface as "active filtering area" eliminating "dead spots" that cause turbulence, increasing air flow and filtering efficiency.
- Installation of the filter is very easy; simply follow the information that can be found in the Honda workshop manual.
- The filtering efficiency is extremely high at **98-99%** filtering efficiency, with 4 layers of DNA Cotton. *(Filtering efficiency is the amount of "dirt" the filter can maintain (stop) and protect the engine efficiently. For example the DNA Filter for every 100 grams of dirt that it will receive, it will hold 98-99 grams, this applies even to fine dirt as small as 5 microns.)*
- The flow of this **New DNA Fcd** filter is very high, **+35.80%** more than the HONDA stock paper filter!
DNA Fcd air filter flow: **220.00 CFM** (Cubic feet per minute) @1,5" H₂O corrected @ 25degrees Celsius
HONDA paper stock filter: **162.10 CFM** (Cubic feet per minute) @ 1,5" H₂O corrected @ 25 degrees Celsius
- This DNA filter is designed as a High flow filter for Race and road use.
- Air Flow data:

**AIR FLOW DATA
MEASURED WITH DNA'S ROTRONICS FLOWSCAN
COMPUTERIZED FLOWBENCH**

**The DNA High Performance filter P-H12S10-01
+ 35.80% increase in air flow & 98-99% filtering efficiency**

-
- For the following HONDA model:
VFR 1200 2010-2011
- **MSRP 70.41 € Euro**
- For Distributors and dealers, minimum first order of 5 units applies.
- High resolution photos and flow graphs are available upon request.

Sincerely,
Voula Karaververi
International Sales Manager
